

## **Advanced course Healing Arts Therapy**

*How to give profound healings with the Liquid Light Frequencies*

Healing with the Liquid Light Frequencies gives your clients profound experiences in regions they often are not aware of they could have entrance to.

The Liquid Light Frequencies contain the information of love, wholeness and lightness and at the same time they open up deep blockades in the person's energetic system. So there can be a very deep emotional release. Because of the help of the Light Frequencies clients stay easily in contact with their objective selves instead of victimizing themselves. The direct energetic and intuitive experiences of the client during a healing session lead to awareness, integration and the activation of the self-healing capacity.

The Light Frequencies unfold fields of information in the client's consciousness. The consciousness of the client is "stretched". The client receives information through clairvoyance (extra-sensory perception through either feeling, seeing, hearing, smelling or knowing, or a combination of that) with help of the light remedies. These fields of information cover one's own childhood and past lives. This goes back to Atlantean and Lemurian times and beyond. The Light Frequencies also cover the fields of information beyond the earth. They activate the light energy in the client, resulting in activated consciousness of galactic energies, and of incarnations on planets and stars with a higher light frequency than the earth. With help of a therapist, a client gains more insight in the totality of his incarnations

In the course we work with the different boxes of Light Frequency. You learn how to work with them in an intuitive way and on the basis of synchronicity. You can use the Frequencies in the clients aura and on the clients body. You can give your client some drops into his mouth or he or she can carry some drops with them (in a glass tube).

Healing Arts Liquid Light Frequencies are etheric, vibrational remedies. They affect the human spiritual bodies and in this way support spiritual development. Healing takes place from the inside out: through the spiritual bodies the mental and emotional bodies are healed and the capacity of self-healing of the physical body are activated. The Liquid Light Frequencies are grounding clients (and yourself) to the core of Mother Earth and at the same time opening up to the cosmic energies up to the Central Sun.

The Healing Arts Therapy is based on the following principles:

- the approach works with the information from the client's inner life. The client brings forth this information. The therapist supports the process by assigning meaning to it and putting it in a larger context

- the body serves as an essential entry point for dissolving the old blockages and is furthermore the carrier of the higher vibrations
- this energetic information is holistic and holographic in nature. Body, Soul and Spirit are involved in the healing and each individual healing contributes to build the morphogenetic field of human existence both in frequency and in consciousness
- the goal of the healing is always to generate higher frequencies of light in the client, or in other words, the activation of the Higher Self and of more light and love for the Self
- a therapist guides the healing with his/her love energy and consciousness on the basis of the principle of resonance or synchronicity (the therapist attracts people for the kind of growth process that he has himself previously experienced)

In the Healing Arts courses therapists\healers learn to feel at home in all these information fields and learn to anchor themselves firmly in its own Light Being so that they can safely guide their clients on planetary journeys and interplanetary healings.

Program:

*First day, based on a full three day program:*

Some general information about the making process of the Frequencies, the different series, background of Joanne van Wijgerden and in general how to work with the frequencies. Then we start to work with them and a very important concept is 'Grounding with light energy'. This grounding will start an intense energetic process in the body. The therapist learns to deal with this. The client starts generating information (intuitively) and the therapist learns how to sustain this process. Working with unconditional love, help clients to generate their source of Light in themselves. Asking Questions. How to start a healing session.

*Second day*

Healing the past by rewriting the past (lifetimes). Healing from current Light Consciousness. Healing through different past lifetimes and through dimensions. Working with inner child and how to redo your birthing process. Connecting this all to the 'Here and Now'.

*Third day*

We will choose from four different subjects: healing family lines, planetary travelling, six dimensional contracts or healing abduction.

The healing information we generate can be quite complex, multifaceted and multidimensional. That's why we prefer experienced healers to attend this workshop or people who know by the information of their heart that they need to be there.

*The Healing Arts Frequencies are made from the heart and filled out by hand. They are miraculously and give you a deep 'Thank you' to what they bring about'*

*'Consciousness gives you insight in the why of your distorted energy fields'*

*'This advanced course is a training in being a multidimensional being having parallel lifetimes, dealing with all the information it sets in motion and stretches you consciousness'*

*'As a therapist you have to know how to 'travel' and to trust yourself to follow the unknown (and yet to know) and let your client see, feel, know or hear'*

*'The Healing Arts Therapy has a profound effect on the body in two ways: the body reacts tremendously on the use of the frequencies and people do not leave their body, but only outstretch their consciousness so the inflow of new vibrations affects the body deeply'*

Practical facts

Where is the course

When

What does it cost. Deposit \$ on .....

How to apply

The course will be recorded and each attendant gets a CD. There is a list of references on the website.

Background Joanne van Wijgerden:

Joanne used to work as a management consultant since 1983 and works as a therapist ever since 1987. Her background is Agricultural University. She studied bio-energetics, aura-reading and attended many healing workshops throughout the years. She started making the Liquid Light Frequencies in 1998. She trains at least 80 people (groups of maximum 22 persons) a year in a 16 days program to work with the Healing Arts Frequencies. Nowadays there are over 400 therapists in the Netherlands and Belgium working with her high frequency vibrational energies on a daily basis. Joanne is a well known healer in the Netherlands specially for therapists and coaches.

In the Netherlands there are over 10 teachers teaching how to work with the Frequencies. The description of the Frequencies have been translated in English and are being translated in German and Spanish.
